OBJECTIVE

Aspiring Software Engineer with a strong foundation in programming, data structures, databases and full-stack development, seeking to contribute to software development and technology driven solutions while continuously learning and building scalable applications.

EDUCATION

Master of Computer Applications, MIT World Peace University — Expected 2027
Relevant Coursework: Computer Networks, Advanced Database Management Systems, Data Structures and Algorithms, Object-Oriented Programming, Artificial Intelligence. .

Bachelor of Computer Science, Sinhagad College of Science — 2022 - 2025

SKILLS

Technical Skills Python, Java, SQL, REST APIs, FastAPI, React.js, PostgreSQL, SQLAlchemy, Git/GitHub.
Soft Skills Problem Solving, Communication, Teamwork, Adaptability

PROJECTS

CareerForge - Career and Placement Platform — ***Python, FastAPI, React.js, PostgreSQL, SQLAlchemy, JWT, GeminiAPI***

- Developed a full-stack career management platform with REST APIs for user profiles, job applications and placement tracking using FastAPI, React.js and PostgreSQL.
- Implemented JWT-based authentication and relational database models using FastAPI and SQLAlchemy to manage user profiles and application workflows.
- Integrated a Gemini API to analyze job descriptions against user skills and generate personalized skill-gap recommendations.

DevTrack - Project and Issue Management Platform — ***Python, FastAPI, React, PostgreSQL***

- Developed a full stack project and issue management platform enabling users to create projects, track issues, assign tasks and manage workflows.
- Built secure REST APIs with JWT-based authentication, role based access and PostgreSQL data models using FastAPI and SQLAlchemy.
- Improved reliability of software by performing Unit, Integration and System Testing.

EXTRA-CURRICULAR ACTIVITIES

- Led a team of 4 students to develop and present a gesture-controlled LED brightness system using computer vision and Arduino; secured 1st Prize at a college-level technology competition. Feb 2024
- Featured in a regional newspaper for technical innovation and project excellence. Feb 2024
- Conducted an introductory C programming session for junior students during a National Teacher's Day event. Sept 2025
